

Extra Credit Assignment

Name: _____

StudentID: _____

Major: _____

Due: 31st March 2011.

The following question is worth 5 points. The score will be added to your final percentage score.

Investigate and discuss the question why mathematics is important in daily life. To answer this, think of the different areas of life and of different situations. Think of persons from different backgrounds, of different ages, with different education. Find information on the internet or in the library concerning this.

The essay should be at least two pages, typewritten with fontsize 10pt, the margins should not be bigger than one inch, the line spacing should be single-spaced. Also make sure that you cite all resources you use correctly.

Use this page as front page. The due date is Thursday, 31st March 2011, in class.
